

U.are.U Fingerprint Reader

Tips for Using and Cleaning

- 1) A commercially available adhesive film is suitable for cleaning. The dirt can be easily removed with the help of the adhesive strips.

Caution: Please do not use any cleaning agents.

- 2) For the device to read the fingerprint, you should place your finger flat and straight on the face of the reader.

Reposition your finger if the device doesn't respond.

- 3) Please note that the functionality of the reader can be impaired by overexposure. If necessary, shield it from strong light.
