Portfolio of manufacturers' products

Whether they are for desktop, remote, or cloud access:
Our solutions cover the many different access scenarios
of today's IT world.

In our portfolio, you will find products from various
manufacturers that have been carefully and
synergistically tuned to one another.

Our software solutions for multi-factor authentication and
single sign-on are supplemented by hardware options
ranging from security tokens to fingerprint scanners and
smartcard readers.

This means that we can choose, from a wide range of
different concepts, the one that gives you a complete
solution that is tailor-made to your IT infrastructure and
fully satisfies your expectations.

Seven reasons why we are the ideal partner for your authentication project

We have almost 20 years of experience

You benefit from our know-how – our exclusive area of focus is authentication.

We are already protecting more than 400,000 users successfully

You benefit from our project experience – businesses ranging from small to large already rely on this experience. We maintain loyal, long-term relationships with many of our customers. Based on the depth and variety of our product range, we can address the specifics of your project and work with you to identify and implement a customized solution.

We develop and optimize our own products

You can benefit from our Custom Enrollment Portal (CEP) and MTRIX Support. These solutions complement our manufacturers' products ideally – allowing us to offer you even greater value.

We maintain loyal, long-term partnerships

You benefit from our broadly based portfolio of products. This portfolio comprises authentication solutions in the software and hardware areas with the products of various renowned manufacturers.

We serve as your central contact partner

You benefit from having us handle any types of problems that arise. We address the issue fully and solve it either directly or in coordination with the manufacturer. You do not need to be concerned about anything.

We count on our in-house Logistics

You benefit from our customized hardware solutions and shipping solutions. With us, you get everything from a single source. We even handle the programming of tokens in Lueneburg.

We are members of several industry institutes

You benefit from our many years as a member of such organizations such as the Bundesverband IT-Sicherheit e.V. (TeleTrust) and the FIDO Alliance. In our industry, we are always state-of-the-art.

Customer testimonials and references

**BMW
GROUP**

BMW Group

We have been successfully assisting the BMW Group in an authentication project since 2017. Our services cover proof of concept, consulting, and license management, as well as IT and project management support. In addition, we developed a registration portal that is tailored to BMW needs and requirements. It guides users, enabling them to register their authenticators in an easy and secure way.

ACTS – Advanced Car Technology Systems GmbH & Co. KG

Advanced Car Technology Systems GmbH & Co. KG in Sailauf is the competency center for vehicle safety within the MAGNA corporate group. This is where modular and functional systems are developed, simulated, and tested at one of the world's most advanced test centers.

Stadt Pfungstadt

To protect our Windows log-ins, we utilize the Advanced Authentication Framework from OpenText. We were able to integrate this solution smoothly, and it impressed us – especially due to its user friendliness and flexibility. MTRIX supported us extensively and was therefore a great source of help in successful implementation of the project.
